

LIFETIME RISK OF DEVELOPING CANCER¹

Talk with your Colonial Life benefits counselor to learn more.

reported being **distressed** about their **finances** during treatment.²

The reality of cancer

Hopefully, you and your family will never face cancer. If you do, it's important to have financial protection to help with treatment and recovery costs that typically aren't covered by most medical insurance plans.

Risk factors

Some look to family history to determine the risk of developing cancer, but that doesn't tell the whole story. While heredity and environmental factors can play a role, cancer can impact any of our lives.

Inherited genetic factors play a major role in only about 5 to 10 percent of all cancers.³

Treatment and recovery costs

Fortunately, more people are surviving cancer thanks to early detection and more aggressive treatments. However, America's workers are often unprepared for cancer costs and the loss of income that can occur during and after treatment.

Γ

Over a third of cancer patients with insurance receiving anticancer therapy were billed for out-of-pocket costs that were greater than expected.⁴

Protect your way of life

Cancer insurance offers benefits that can help you pay for cancer-related expenses that medical insurance may not cover, such as:

- Loss of income
- Deductibles and co-pays
- Out-of-network treatment
- Lodging and meals
- Child care

Cancer insurance may also provide a benefit for covered cancer screenings and wellness tests to encourage early detection.
